Tests	Norms	Results
Density (kg/lit.) @ 25°C	ASTM D1475	0.98 ± 0.05
Consumption Rate	-	350-400 gm/m <sup>2</sup> /coat thickness 200-225 μ

## Application

The surface should be clean, and free of all contaminants, dust, oils, grease before applying the BMA Powder Putty. Add water to Powder Putty in the following proportions: 40 - 45 L water: 100 kg powder, thoroughly mixed. Therefore, depending on the roughness of the surface, apply one or more coats of Powder Putty with a putty knife. Before applying the next coat, each layer should be dried and sanded down. Water should be used to clean tools immediately after use.

## Drying Time

Drying time = 4 hours

## AVAILABLE PACKAGING

Bag: 25 kg

## SHELF LIFE

BMA Powder Putty should be kept in tightly closed, undamaged containers that are not too humid. Exposure to direct sunlight should be avoided. BMA powder putty is stored 12 months under proper and dry storing conditions.

Under the above mentioned conditions, the shelf life BMA Powder Putty will be 2 years.

After this period, the paint quality is subjected to re-inspection. Proper handling is required to maintain good quality.
